Paul Koop M.A.

Since my retirement in 2022, I have been dedicating myself to collecting and archiving my most important works on GitHub. I am now looking for committed successors for these projects.

Düsseldorf student inventory

One of my most important works is the Düsseldorf Student Inventory - a published, reliable, valid and objective personality inventory for students in transition classes. The inventory was implemented in various programming languages, including R, SPSS, PHP, MySQL, Lazarus, Delphi, Android Studio, Xcode and Xamarin.

This work was originally created as part of my work in the construction industry, where I lacked a suitable measuring instrument for pre-selecting applicants for training positions.

You can find more information and source codes at:

https://www.mein-duesk.org https://github.com/pkoopongithub

Algorithmic Recursive Sequence Analysis

Another central project is Algorithmic Recursive Sequence Analysis - a published methodology for reconstructing social processes and structures using formal languages. This methodology has been implemented in various implementations, including a grammar inducer in Scheme, a parser in Pascal, a transducer in Lisp, and a multiagent system in Python.

The analysis was created in the 1990s as a result of my engagement with the cognitivist models of Douglas Hofstadter and Rudy Rucker.

Fine Kurzneschichte zu Poethumeniemus. Transhumeniemus und zum Omenanunk

Des Promjes-Projekt, Eller Kurzpenchichte zu Profitzmeinnism, Tamchumeinnum und zum Chregopunk, 2023

Des Hüchtenheimen follen nucht die Röhnsensperichte des Debensträten einer Promjes-Struktisten, um bisogammerkten und Erstahnsbegstellen der Kl. zur Optimismig und Weiterwerfschliching von Ortfolksperichtenbeiten und Apprümere der Coulierenformatis zu zusten zur Lauge Langung Mischel en hinder Ergebeisspatikt zu kambeleinen. Dienen sollen des am EU-Projekt des R. Rühmerengosemme bestelligten Projektapstreiner sindere sollen zu der Scharfenbeiten und Chregopungsbese beleine Aufmerzuge zeit follweissperichten und der Scharfenbesche und der Aufmerzuge und der Scharfenbesche und der Scharfenbesche und der Aufmerzuge und der Scharfenbesche und der Scharfenbesc

Project Pompeii

The Pompeii Project is a fictional world that now exists in three versions. The stories cover topics such as quantum computing, generative pre-trained Transformers and the Omega Point.

Die Vereinigung von Wissen, Glauben und Leben:

Ein existenzphilosophischer Blick auf das menschlichen Leben und die Evolution

David Deutsch Meditations

In the David Deutsch meditations I reflect philosophically on the Omega point and its implications.
